

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT *Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.*

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 6 (11-15 Oct 2026) - Period 1	Unit 2 - 2.1 Creative Photo Editing (3/3)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 6 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Collage homework: 70% uploaded; most applied Old Photo well but few credited sources. Today: model a credit line and use artistic filters.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students apply painting effects in GIMP (GIMPpressionist, Apply Canvas, Oilify) and adjust brush, paper and orientation settings to create an artwork. Sprint 2.1 obj. 3-4; Master Challenge 2; ISTE 6.b.

Key knowledge / skill / understanding:

Artistic filters simulate brush strokes and textures; Preview before OK; settings change stroke size, direction, depth.

Success criteria — what will successful learning look / sound like?

I can apply GIMPpressionist, Apply Canvas and Oilify through Filters > Artistic; I can change at least 2 settings in each and explain the effect on the image.

Likely misconception / access or challenge need:

More effects = better art; Oilify 'mask radius' confused with image size.

2 PROOF — What will students do to show they have learned it? *Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.*

ACTIVITY 1 <i>student task + evidence of learning</i>	ACTIVITY 2 <i>student task + evidence of learning</i>	ACTIVITY 3 <i>student task + evidence of learning</i>
Strategy: Stations / carousel ☒ Time: 12 min	Strategy: Project-based task ☒ Time: 18 min	Strategy: Debate ☒ Time: 8 min
What students will do: Three short stations (4 min each) on the same image: Station A GIMPpressionist (Paper/Brush tabs), B Apply Canvas (Direction, Depth), C Oilify (Mask radius, Exponent). Note one setting change and its effect at each.	What students will do: Create a 'painted postcard' of a place you love: apply at least two painting effects with chosen settings, add your name, and export as .png.	What students will do: Quick class debate: 'Is a filtered photo still the original photographer's work?' Two sides, 2 speakers each, then vote.
Evidence tool: Observation checklist ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Rubric ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Oral questioning ☒ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: 3 station cards with menu path and screenshot; same base image on all PCs; QR video 1CA9.	Resources: GIMP; postcard template; 4-level rubric (technique, settings, creativity, export).	Resources: Debate prompt slide; IP vocabulary (copyright, remix, credit).
Support (low performers / SEN): Station cards with numbered screenshots; mixed-ability groups.	Support (low performers / SEN): Template with locked text layer; choose 1 effect minimum.	Support (low performers / SEN): Sentence starters in English with key-word translations.
Stretch (fast learners / gifted): Record the exact values that gave the best result at each station.	Stretch (fast learners / gifted): Mix effects on separate layers using layer opacity; justify the artistic choice.	Stretch (fast learners / gifted): Link the argument to IP law from Sprint 1.3.

3 PREPARE — What do I need to do so students can succeed?				4 RESPOND — What will I do with what I see and hear?			
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned				If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve			
My setup / modelling: Time: 5 min Hook: three famous painting styles next to filtered photos - 'Which is real paint?'. Model GIMPpressionist dialog (Paper, Brush, Orientation, Size, Placement, General tabs) with Preview on. Show credit line model: 'Photo: name, source, licence'. Share rubric.				What I will watch for / likely responses: Students stacking every effect; forgetting Preview so GIMP becomes slow; very large images freezing older PCs (resize to max 1200 px first). Likely response: 'I don't see a change' - small settings on a big image.			
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> Carousel stations on PCs plus a mini-debate linking creative editing to IP and ethics (connects Unit 1 to Unit 2).				Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Self-assessment against the rubric (circle your level) + Forms exit ticket: name the 3 artistic filters and one setting of each. Time for learners' questions.			
Progress recorded / shared: ☒ Gradebook ☐ Parents ☒ Written feedback in notebook / portfolio				Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload the painted postcard + credit line. Complete student-book exercise questions 1-3 (Sprint 2.1).			

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Stations kept everyone active; mixed-culture groups compared styles from their home countries. Debate brought out strong views on remixing; quieter students spoke with starters.	What will I change next time? Resize images before stations - 2 PCs froze on Oilify. Shorten debate to 6 minutes and give export more time.	Students needing follow-up: 10/4: 3 students need to finish postcard export; one gifted student can mentor others on layer opacity next lesson.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>
