

MRISB 4-STEP LESSON DESIGN | UbD × ETEC

OUTCOME → PROOF → PREPARE → RESPOND → REFLECT Plan the learning first; let the checklist follow. Click a field to type • click a box to tick it.

Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbially	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 13 (29 Nov-3 Dec 2026) - Period 1	Unit 4 - 4.3 Game Enhancements (1/2)
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 13 / Lesson 1 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Bug-fix homework: 75% fixed one bug; playtest logs good. Today: enhance UX with custom cursor and custom popup box.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS) Students customise the cursor (glove image) and replace alert() with a custom popup box (HTML/CSS/JS show/hide) to improve player experience. Sprint 4.3 obj. 1-2; Challenge 2; CSTA 3A-AP-19.	Success criteria — what will successful learning look / sound like? I set a custom cursor with CSS; I create a styled popup div that shows results and closes with a button; I test it on my game.
Key knowledge / skill / understanding: cursor: url() with fallback; display none/block or class toggle to show/hide; overlay.	Likely misconception / access or challenge need: Any image size works as a cursor; alert() can be styled.

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Discussion / dialogue ☐ Time: 6 min	Strategy: Modelling / worked exam ☐ Time: 22 min	Strategy: Inquiry / investigation ☐ Time: 9 min
What students will do: Compare alert() vs a custom popup in two games; discuss what feels better for players and why (UX).	What students will do: Add the glove as custom cursor, then build the results popup (div, overlay, message, close/restart button) and toggle it with classList.	What students will do: Choice board: (a) restyle popup, (b) different cursors per glove, (c) add keyboard close (Esc) for accessibility.
Evidence tool: Oral questioning ☐ Assessment: ☒ Diagnostic ☐ Formative ☐ End Grouping: ☐ Individual ☐ Pair ☒ Group	Evidence tool: Practical / performance task ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Self-assessment checklist ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group
Resources: Two demo games.	Resources: VS Code; QR 'Customize the cursor', 'Create a customized popup'; sources.	Resources: Choice board.
Support (low performers / SEN): Picture comparison with key words.	Support (low performers / SEN): Popup HTML/CSS ready; students write JS toggle only.	Support (low performers / SEN): Option (a) recommended with guide.
Stretch (fast learners / gifted): Name 2 UX principles.	Stretch (fast learners / gifted): Challenge 2: 9-image page with a mini-camera cursor.	Stretch (fast learners / gifted): Option (c) plus focus trap.

3 PREPARE — What do I need to do so students can succeed?

Set students up to succeed:

- ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared
☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources
☒ Praise, recognition and reinforcement planned

My setup / modelling: Time: 6 min

Hook: play your game - the alert box interrupts. Model CSS cursor with fallback (32x32 png), then the popup structure and `classList.add/remove('show')`. Share success criteria and the choice board.

What is new or innovative in this lesson? (ETEC looks for this)

Choice board gives learners control; accessibility option (keyboard Esc) introduces inclusive design.

Progress recorded / shared:

- ☒ Gradebook ☐ Parents ☐ Written feedback in notebook / portfolio

4 RESPOND — What will I do with what I see and hear?

If students struggle or finish early I will:

- ☒ Re-teach ☒ Regroup ☒ Give extra support
☒ Stretch ☒ Have students redo / improve

What I will watch for / likely responses:

Cursor image too large (not shown); popup hidden behind elements (z-index); popup not resetting game. Response: 'my cursor doesn't change' - size/path.

Close / exit check (summative + time for learners' questions) Time: 7 min

Exit ticket: write the CSS for a custom cursor with fallback; one choice-board task completed. Learners' questions.

Homework / platform (e.g. Madrasati)

Madrasati: upload screenshot of popup; watch QR 'Audio elements' video.

5 REFLECT — After the lesson *Complete within a day. This is reflective-practice evidence and feeds your next Starting point.*

What worked — and how do I know?

Choice board raised motivation; several chose accessibility. Custom cursor done by 90%; popups by 70%.

What will I change next time?

Provide a cursor image already resized. Model z-index briefly before practice.

Students needing follow-up:

10/2: students absent last week need the core logic fixed source; 2 SEN students need the popup template.

COVERAGE CHECK *Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.*

Literacy read + write · 2-1-1-6	Numeracy numbers / data · 2-1-1-6	Digital students use it · 2-1-1-4	Digital research trusted sources · 2-1-1-4	Real-life ① application · 2-1-1-5	Real-life ② application · 2-1-1-5	Inquiry experiment / research · 2-1-1-7	Thinking problem-solving · 2-1-1-7
