Teacher	Subject	Grade / Section	Date / Period	Unit / Topic
Mr. Ashraf Elbialy	Computer Studies (DigiChamps L10)	Grade 10 - Classes 10/1 to 10/6	Wk 14 (6-10 Dec 2026) - Period 2	Unit 4 - 4.4 Animations (2/2) + Term 1 showcase
Pacing (2-1-1-2): ☒ On plan ☐ Ahead ☐ Behind Weeks ahead / behind: 0 Week / lesson: Week 14 / Lesson 2 of 2		Starting point (2-2-1-3): What did my last check (quiz, exit ticket, homework) show — and what am I changing today because of it? Animation exit ticket: 78% correct keyframes. Final lesson of Term 1: glove and popup animation, then a peer-playtested game showcase.		

1 OUTCOMES — What must students learn?

Desired learning outcome(s) — trace to the curriculum / standard and the table of specifications (ToS)

Students implement the glove animation (catch motion) and popup box animation, finalise the worm game and present it in a showcase with peer evaluation. Sprint 4.4 obj. 3-4; CSTA 3A-AP-19, 3A-AP-23; ISTE 6.d.

Success criteria — what will successful learning look / sound like?

My glove animates when catching a worm; my popup animates in; my game runs without errors; I explain one design decision to visitors.

Key knowledge / skill / understanding:

Trigger CSS animations by adding a class in JS; animationend event; documenting design decisions.

Likely misconception / access or challenge need:

Restarting an animation needs a page refresh (remove/add class instead).

2 PROOF — What will students do to show they have learned it? Three activities, each with a DIFFERENT strategy, resource and evidence tool. Then tick the Coverage Check on page 2.

ACTIVITY 1 student task + evidence of learning	ACTIVITY 2 student task + evidence of learning	ACTIVITY 3 student task + evidence of learning
Strategy: Modelling / worked exam ☐ Time: 10 min	Strategy: Project-based task ☐ Time: 15 min	Strategy: Stations / carousel ☐ Time: 13 min
What students will do: Code along: add .catch class on click to trigger glove swing, remove on animationend; add scale-in animation to the popup.	What students will do: Final polish from your list: fix remaining bugs, check responsive layout, sounds, mute, animations; write 3-line README of design decisions.	What students will do: Game showcase: half the class hosts at their PC, half rotate and play, then swap. Visitors leave feedback using the rubric on Forms.
Evidence tool: Mini-whiteboards ☐ Assessment: ☐ Diagnostic ☒ Formative ☐ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Self-assessment checklist ☐ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☒ Individual ☐ Pair ☐ Group	Evidence tool: Peer-assessment checklist ☐ Assessment: ☐ Diagnostic ☐ Formative ☒ End Grouping: ☐ Individual ☐ Pair ☒ Group
Resources: VS Code; QR 'Download the full project'; source CSS.	Resources: Final checklist; README template.	Resources: Forms peer rubric; QR codes on each PC to the form.
Support (low performers / SEN): Ready CSS; students add one line of JS.	Support (low performers / SEN): Checklist limited to 5 must-haves.	Support (low performers / SEN): Host script card to explain the game.
Stretch (fast learners / gifted): Add a combo animation when 3 worms are caught in a row.	Stretch (fast learners / gifted): Add a credits page citing images/sounds sources.	Stretch (fast learners / gifted): Host explains code for one feature to visitors.

3 PREPARE — What do I need to do so students can succeed?	4 RESPOND — What will I do with what I see and hear?
Set students up to succeed: ☒ Hook / prior learning ☒ Explain or model ☒ Success criteria shared ☒ Key vocabulary / examples ☒ Real-life connection ☒ Clear instructions / resources ☒ Praise, recognition and reinforcement planned	If students struggle or finish early I will: ☒ Re-teach ☒ Regroup ☒ Give extra support ☒ Stretch ☒ Have students redo / improve
My setup / modelling: Time: 5 min Hook: final game trailer. Model class-toggle animation trigger with animationend. Explain showcase routine, timing and respectful feedback. Share final rubric.	What I will watch for / likely responses: Animations triggering once only; last-minute breaking changes - insist on saving a backup before changes; visitors giving vague feedback. Response: 'it worked before!'.
What is new or innovative in this lesson? <i>(ETEC looks for this)</i> End-of-term showcase where every student is host and reviewer; README documents design decisions like real developers.	Close / exit check <i>(summative + time for learners' questions)</i> Time: 7 min Summative reflection on Forms: what I learned in Units 2-4, my best feature, my next goal. Learners' questions and celebration.
Progress recorded / shared: ☒ Gradebook ☒ Parents ☒ Written feedback in notebook / portfolio	Homework / platform <i>(e.g. Madrasati)</i> Madrasati: upload final zipped game + README. Over the break: share your game with family and note one suggestion.

5 REFLECT — After the lesson <i>Complete within a day. This is reflective-practice evidence and feeds your next Starting point.</i>		
What worked — and how do I know? Showcase was the highlight: students explained code confidently in English, with peers translating for newer learners. 85% of games ran fully.	What will I change next time? Allocate a full period for showcase next year; polish time was tight. Collect backups earlier in the week.	Students needing follow-up: Students who did not finish (approx. 2-4 per class): extension deadline in Term 2 week 1; share high achievers' games as exemplars.

COVERAGE CHECK <i>Tick where each must-have happens (1 · 2 · 3 = activity, C = close, H = homework). An empty box is a gap to fix before teaching. Literacy and numeracy apply in every subject.</i>
